Villas > Corfu, Greece

ID: RR387

5.000.000 €

Description

A stunning property located on the North East coastline of Corfu. Built on a hillside this property has the rare combination of being in a rural, secluded and private location, a dream holiday home near the sea, and within walking distance of a village. It consists of two separate 3-level attached villas with separate private entrances.

Each villa has a huge area of sitting room, leading to the kitchen and dining room, all cleverly combine to make an amazing living space; 4 bedrooms and 3 bathrooms. In front of the villas there are two swimming pools, one for each villa. The property enjoys majestic coastline views which almost take your breath away and was built from locally quarried stone, to ensure that despite its newness, the house would merge into its natural surroundings of stone clad landscape of maquis, olives, and spear like cypresses, in spring and autumn carpeted with pink cyclamen.

No expense was spared to create a home that incorporated every modern comfort, combined with large, light, and airy rooms, each with their individual view and terrace. The house is built on a

steep hillside with the living areas on the higher level, making the most of the fantastic views. The huge area of sitting room, leading to the kitchen and dining room, all cleverly combine to make an amazing living space. A TV room for "vegging out", Wi-Fi, computer and printer ensures a private space for the city executive! Outside, the surrounding leisure and entertainment area is where much of the day will be spent, the spectacular two pools providing the focal point.

From the pools, the terraced, garden area slopes down to the track which leads guests either to a lovely bay, or to the village no more than 5 minutes walk away.

In early summer, wild flowers still proliferate, a time for walking and exploring. In the high summer months, unlike the shores of other fashionable Mediterranean resorts, the area still remains relatively peaceful, slipping into Autumn, long summer days, a warm sea and cooler nights.

The property is to be sold as a whole and can be used as two separate households, but there is also the possibility of joining the two villas and create one large villa. The structure of the building is already prepared for such a solution.
